

Appendix 2 – User guide (Software)

In order to use Codzworth Cross-platform version on a computer, the computer should have an up to date version of Java.

Java can be downloaded at the following address: <https://www.java.com/en/>

In order to use Codzworth Windows 10 version on a computer, the computer needs to be running a Windows 10 operating system, have an up to date version of Java, and be capable of communicating over Bluetooth.

All of the software components developed by this project do not need to be installed and can be run straight away.

In order to open a file using Codzworth users should perform the following steps:

1. Open the application
2. Open the 'File' menu
3. Select the 'Open' option
4. Navigate to the location of your file
5. Select the file and click 'Open'

In order to export as an image the current heat map view:

1. Open the 'File' menu
2. Select the 'Export' option
3. Navigate to the location where you would like to save your file
4. Enter a name for your file
5. Select 'Save'

In order to connect to your BLE-enabled board:

1. Open the 'File' menu
2. Select the 'Start CdZConnect' menu
3. Turn on the board

The 'Help' menu contains a user guide, the software license, and a credits page.
